

Route A Galaxy

TUESDAY: SAN CRISTOBAL ISLAND

San Cristobal airport. Reception at airport. Transfer IN. Welcome on board Galaxy Cruise. Welcome drink and lunch.

PM LOBOS ISLAND. Panga Ride, swimming and snorkeling. Description of the place: this place is the habitat of seals, frigates, finches, marine iguanas, lava lizards, and the small endemic Galapagos snake. Here, we can swim and snorkeling in the same place. Leon Dormido: This is formed by two rocks of approximately 148m above sea level named thus by its similitude with a lion we will pass between both rocks but we will not disembark because is not possible to do it.

WEDNESDAY: ESPAÑOLA ISLAND

Breakfast early in the morning. Our first visit: BAHIA GARDNER: wet landing, activities for this visit: short walking, swimming, snorkeling, and observation of seals colony.

The sea lion is one of the animals in Galapagos which gets the total attention of the visitors in the Galapagos: they are curious and playful, but at times aggressive; they are nice and loving, but also lazy. In Gardner Bay, we are going to find many of them relaxing in the beach enjoying of the sun. Snorkeling in the area where we will be able to swim with them, besides you observe these fascinating animals, we will swim with the sea turtles, diversity of tropical fish, marine iguanas etc. We will return to the ship, to sail toward the following island. Lunch.

SUAREZ POINT: dry landing, activities that were carried out in this place: walking; recommendable clothes: sports shoes, hat, cap, solar lotion. There is not color more amazing and outstanding in this tropical desert island that the blue-foot boobies; they have an impressive form to "greeting" and it is a real spectacle to see the ritualistic parade of the entourage. In several islands we can admire this bird due to that nests and feed are located in diverse places close to the coast. In this place we will be able to observe the Albatross with a weight from three to four kilograms and an importance of more than two meters, this creature of aristocratic aspect is one of the largest birds of the islands. Around twelve thousand couples have their nests in the Española Island (some few in the Silver Island near of main land Ecuador). This specie is considered endemic from this island during our walking we will be able to observe these fantastic birds, we will be part of the beautiful and only landscapes that offers this island. Important Note: Albatross will be not possible to see between January and March. Also we will observe colonies of marine iguanas, zayapas, mask boobies, finches, Española cucuves, and seagulls unique of the island. Our walking will be for lava rock path where we will be able to admire the hollow blowers. The vegetation of this island is of red mangrove. Delicious Snacks and fresh beverages expect for you.

THURSDAY: FLOREANA ISLAND

Breakfast early in the morning. Our first visit will be POST OFFICE (Mail Bay): Wet landing. Activities in this place: short walk, swimming, snorkeling, review of the mail. Description of the Place: it is situated to the north of Floreana Island. The Post Office

Bay name is because of Capitan James Colnett installed an empty Ron barrel, to use it as post office for the whaling fleets that frequented for a long time the Galapagos Islands. You can send some postcards from here to your friends and relatives or interchange letter to deliver in their destiny. Return. Delicious snacks and beverages will be expecting for you and lunch

PUNTA CORMORANT: wet landing, snorkeling and short trekking. This point is located at west of Floreana Island and it is famous to has a dark green beach due to the great quantity of olivine crystals. You can see many marine invertebrates, as well as also sea lions, sea iguanas, the frigates and pelicans. Second visit: **DEVIL'S CROWN:** Activities in this place: panga ride and optional swimming. Panga ride around of a small island, this place was a satellite islet of the island Floreana. Here, we will find a group of rocks that seem to a crown, due to the constant erosion caused by the sea. It is one of the better places to do snorkeling (superficial diving) in the interior and around of the crown, excellent visibility to admire a great variety of fishes and sea animals.

FRIDAY: SANTA FE ISLAND & SOUTH PLAZAS ISLAND

SANTA FE: Wet landing, activities for this day: hiking, swimming and snorkeling. Description of this place: With 24 Km² and 60 meters of height above sea level, it is an almost central island that has a unique place of visit: an incredible bay with turquoise water protected by a natural barrier of rocks and from you can appreciate colonies of seals and hawks flying over. It is home of one of the two species of land iguanas that have the islands, their main food are the leaves and fruits of the large and thick cactus. Crabs, nocturnal herons, marine iguanas, cucuves and land doves are seen frequently. The Bay is excellent place to swim and to do snorkeling. Marine Tortoises, rays, sea lions and tropical fishes are an amazing attraction! Snacks and refreshing beverages expect for you on board. Lunch. Navigation toward South Plazas Island.

SOUTH PLAZAS are two small islands, created by land uplift where land iguanas are known to be smaller; they nest during warm time. The hike goes along an extraordinary cliff where sea birds nest.

Approximately, in this Island there are 1000 sea lions (*Zalophus wollebaeki*) and they are located in south side of Plazas

SATURDAY: SANTA CRUZ ISLAND

We take our breakfast very early in the morning. Our luggage and all your belongings should be list to check out in the ship, our last visit: ESTACION CHARLES DARWIN.

Charles Darwin Station is located in the Main Port of Santa Cruz Island, we will take our private bus that take us to the entrance of the center of breeding where we go to appreciate tortoises and land iguanas in captivity, this center is the main site of breeding of the islands. Animals that were in danger of extinction in the different islands are maintained in captivity and thanks at dedicated work of several institutions some species are saving, here was where the most famous tortoise "the Solitary George" the last survivor of the species of Pinta Island lived. Transfer Out.
